+ EDUCATION

Bachelor in Information Technology

ISMT College / Chitwan / October, 2019 - May, 2023

+ TRAINING/CERTIFICATION

Front-end course

Vrit Technologies / 2023

+ PORTFOLIO

Developed a live stream web app

During my bachelor's program, I conceptualized and developed a dynamic web application centered around live streaming videos. This project not only showcased my proficiency in web development but also demonstrated my ability to create an engaging user experience by seamlessly integrating real-time video streaming technology.

Developed a portfolio web app

I made a portfolio website using HTML and CSS. It's a neat display of my work, easy to use on all devices. Each project shines in its design "frame." Simple words, colors, and layout show my style. This website is where my love for design and web skills come together. Explore and enjoy!
